### **Introduction**

Independent of mind and spirit, cats have always displayed outright indignant behavior at any attempt to train them. Having a mind of their own and a highly changeable nature, cats are unlike any other animal you've owned. The favorites of many, they are misunderstood by all. Astrology helps us to understand some of the quirks these highly intelligent animals display.

Are they good house pets or will they drive you crazy until, against your better judgement, you let them out? Refined hunting skills and sharp instincts are common traits of most cats. Some are known for their patience, or perhaps for nurturing others. Others just prefer your lap, or to lounge on the sofa until served

their favorite meal.

The many personalities we see displayed in these wonderful creatures are all part of the plan. Would you automatically choose a beautiful Taurus Cat if you knew that Venus will always make her attractive? Cassie Cat's chart can show you just how important some things are for her survival. What makes Cassie Cat tick and what can she absolutely not do without? How can you add more enjoyment to Cassie Cat's life? Does she need companionship or is she just as happy not sharing your attentions with another cat? These are some of the questions we seek to answer when looking at our beloved feline's chart. Astrology can guide you to get the most enjoyment out of your cat. Cassie Cat will thank you for it.

There are 4 basic elements that make up a chart; they are earth, water, air and fire. If Cassie Cat has four or more planets in one of these elements she is considered to have more than average. Applying a weight or number to these planets, we can determine if the chart has tendencies that would be influenced by being overweighted in that particular element. The Ascendant, Midheaven and planets on the angles are also given a number, which is included in determining the makeup of a chart.
