### **Introduction**

Your animals can be your best friends in life. Just like us, they also have their unique personalities. We may not always know their exact time of birth but we can still look at the chart for the day of birth and determine an incredible amount of information. If the exact time is unavailable a Sun sign chart will be used as the basis for the chart. We can benefit by knowing where our pets' full potential might be met. And like our human friends there may also be difficult areas of their personalities, which we must learn to accept or correct. Not all dogs are suited for agility or obedience. Some will do better at guarding their masters; others might behave well in conformation. By understanding the potential of our dogs we seek ways to improve what already exists and accept things that are sometimes unchangeable or a challenge.

There are 4 basic elements that make up a chart; they are earth, water, air and fire. If Hazel has 4 or more planets in one of these elements she is considered to have more than average. By giving a weight or number to these planets we can determine if the chart has tendencies that would be influenced by being overweighted in that particular element. The Ascendant, Midheaven and planets on the angles are also given a number, which is included in determining the makeup of a chart.
